

# DELAMINATOR

## CD 30D

The CD30D delaminating machine has been designed to handle LCD panels up to 30 inches in diagonal and uses the same principles as our proven range of delaminating machines.

### Featuring:

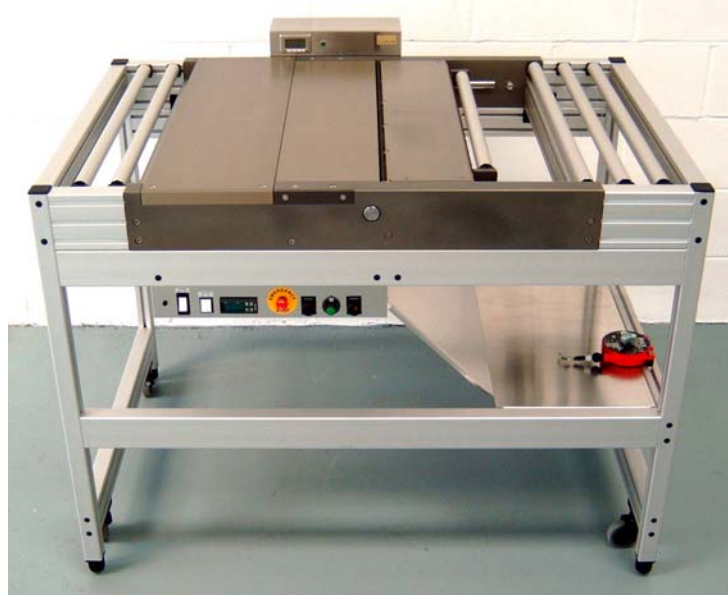

Panel face down removal process with film ejected from the machine as it is removed.

Shoe plate removal method with powered non-contact pickup roller to minimise the risk of Mura.

Selectable peel temperature with automatic thermocouple control.

A re-usable leader to engage the film into the machine.

Rubber coated exit rollers to support the panel during delamination and prevent any possible glass distortion.

### Machine specification:

All anodised aluminium & st. steel construction.  
220v supply required.

Supplied with corner peel hand tool.  
Solid steel pickup roller.

Fully adjustable pickup roller speed control with LCD readout in mm/sec.

Operator selectable heat control to ease hard to remove films.

Overall dimensions: 1300 x 1020 x 1000mm (WxDxH)

Approx weight: 120Kgs

Built to order – leadtime 6-8 weeks.

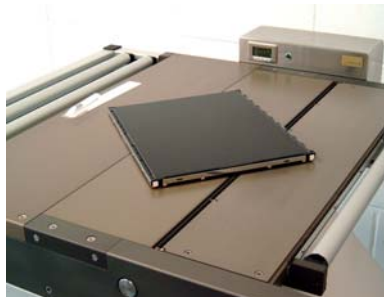

### Process

#### Capabilities:

Delaminates polariser film from LCD panels.

Accepts bare glass or backlight still in place.

Will accept panels of any thickness, including deep section backlight units.
